Reasons for Allowance

1. Claims 1-5, 8-29 are allowed. The cited prior arts taken alone or in combination fail to teach the algorithms cited in manner in independent Claims 1, 9, 18, and 21. Particularly, see all reasons in all Applicants' remarks.

Various prior arts teach updating firmware, where Examiner has relied on the closest prior arts of record: Bramley, Jr., US Pat. No. 6,889,340 B1.

Bramley, disclosed modifying firmware by configuring an available space in a flash memory using for storing diagnostic programs and data.

However, Applicants have traversed the reference of record and contended that Bramley fails to teach the identical invention as recited in claims 1 and/or 18, that Bramley fails to disclose "writing updated firmware data to a pad file in the persistent firmware memory that is different from a memory location of the existing platform firmware data so that the persistent firmware memory comprises both the existing platform firmware data and the updated platform data".
